KWC shower hoses	93
KWC siphons and tub spouts	93
KWC shut-off valve	93
General information	94

Hygiene

HealthProtect

Better hygiene and unchanged water quality: HealthProtect highlights the strict standards we set ourselves to ensure that our faucets do not affect the taste and smell of your water – that is why we use high-quality materials (metals, plastics) that are ideally suited for contact with water.

SprayClean

Actively helps with the removal of limescale: With a special faceplate and fastening mechanism, SprayClean prevents limescale build up. Any deposits are sprayed away automatically when the water is running. The special fastening mechanism helps with more stubborn lime deposits: simply turn, clean, and the job is done.

TripleClean

Three water streams for more flexibility: TripleClean allows you to change between a normal stream for filling glasses, a soft spray for gently cleaning food, and a power spray for pre-rinsing and removing dirt from dishes.

LEDShine

Visible precision and a bright, friendly workspace: LEDShine does more than just contribute to a special working atmosphere – this innovative feature makes it easier to see the tiniest specks of dirt and makes it possible to use the faucet without turning on a light.

HybridControl

Touchless operation and flexible control: Allows touchless activation of cold water via a sensor, as well as manual mixing of hot and cold water using the lever. Cutting-edge technology for intuitive handling and versatile applications.

PurifiedWater

Enhanced purity and unaltered water enjoyment: Featuring advanced filtration technology, this solution minimizes particles larger than 0.5 micrometers, including heavy metals, microplastics, chlorine odors and tastes, as well as bacteria. Impeccable water quality to meet the highest standards.

DualFlow

Maximum hygiene and uncompromised safety: Separate water conduits ensure that mixed water and filtered water never come into contact. An intelligent solution that guarantees absolute purity and unaltered taste.

Sustainability

EcoProtect

For economical water consumption and responsible use of resources: EcoProtect represents our commitment to promoting a sustainable lifestyle.

CoolFix

Intelligent and efficient resource usage: With CoolFix, when the lever is in the center – the most common position – the water runs cold. Only when the lever is turned to the left, the water runs warm.

GlacierFinish

Robust surfaces and high-quality craftsmanship: GlacierFinish is equipped with durable surfaces that are exceptionally robust and feature an attractive polished shine that you can enjoy for years to come.

PrecisionMove

Exceptional elegance and precision: PrecisionMove allows for seamless movements and exceptional convenience thanks to our consistent use of top-quality materials and superior craftsmanship.

QualityControl

Exceptional quality from A to Z: With KWC QualityControl, we guarantee the utmost product reliability. KWC performs and continuously monitors all stages of the process: development, production, installation, and even the manufacture of the required tools.

Safety

TouchProtect

Safe to use: An insulated hot water guidance system with a “double skin” principle means the body of the faucet or the pull-out spray can become warm but never hot. In this way, TouchProtect intelligently prevents scalding.

SkinProtect

Effective protection against scalding: With SkinProtect, your faucet will only supply you with water hotter than 38°C when you press the safety button on the temperature controller. If the cold water is shut off, the faucet automatically shuts off the hot water immediately.

SwivelStop

Stops the faucet from moving too far and prevents water damage: Swivel-Stop allows the swivel range to be adjusted from 360° to 120° or 150° in just a few steps, ensuring that the water only flows into the sink.

QuickConnect

Easy installation and more safety in the kitchen: with QuickConnect, there is no need to screw on the spray head hose, which means there is also no risk of damaging the seal and causing water damage.

CertificationGuarantee

Trust is good, certifications are better: Our KWC CertificationGuarantee ensures that we have all of our products professionally inspected and certified across all markets.

SprayLock

Adjust the flow: With SprayLock, you can keep the jet of water from your faucet flowing exactly how you want, even when the water is shut off. When you turn the water back on, the water flows in the same way again.

Enthusiasm

DesignSpray

Elegant design and functionality: With DesignSpray, the pull-out spray is seamlessly integrated and recessed. It can be easily extended with just one finger.

UniqueLever

Innovative lever designs that allow for natural and intuitive use: UniqueLever features innovative KWC design – elegance and precision that you can not only see, but also feel every day.

QuickInstallation

Hassle-free positioning and fastening of the threaded connection for quick and easy installation: The locking nut is screwed into place by hand to hold the faucet in position using QuickInstallation, before it is fixed in place via the two locking screws.

IntelligentControl

Intuitive control meets modern convenience: IntelligentControl reacts to a tap of your finger, can be programmed based on your personal habits and requirements, and has a light ring that indicates the current water temperature.

PowerClean

The spray you want at the touch of a button: PowerClean makes it exceedingly easy to switch the flow of water on the spray head – from a standard spray to a fine needle spray.

TwistProtect

Effortless work around the sink: TwistProtect prevents the hose from twisting or knotting.

OptimalSpace

Practical yet elegant ergonomic design: OptimalSpace features long, tall spouts that provide ample space for washing and working.

EasyLock

A spray that is easy to use and automatically snaps into place: EasyLock is equipped with special positioning pins that ensure that the pull-out spray is always in the right position.

HighFlex

Increased freedom of movement and ease of use: HighFlex makes it possible to move the spring hose in every direction while ensuring it remains reliably stable when not in use.

The bathroom as an oasis of well-being

Recharge your batteries and take a break – or quickly and easily get ready for the day ahead: with our wash basin, shower and bath taps, every bathroom can become your haven of relaxation. A wide range of design-strong taps that not only look great, but are also a lasting delight thanks to their intuitive and safe operation and their high-quality materials.

KWC ACTIVO

A unique design

KWC ACTIVO is so bold and self-assured that it can even be combined with more playful elements to create a well-balanced, stylish whole that perfectly harmonizes rigorous design, sensuality and lightheartedness. A line of faucets with a dynamic feel that brings fresh energy into the bathroom every day.

Inviting lines: the lever is slightly bent upward, which makes it fit perfectly into the user's hand and also gives off a feeling of openness and lightheartedness.

KWC AWA 2.0

Design and function in playful harmony

Unique flat lever, elegant soft-cube design, ultrasleek silhouette – those with an eye for the essential will recognize the clear statement in the KWC AWA 2.0. Whoever lives here knows exactly what they want from life – and from their bathroom: stylish confidence, simple elegance, excellent quality, and functionality so perfect that you barely even notice it.

The unique flat lever of KWC AWA 2.0 is symbolic of its perfect synthesis of modern architecture and contemporary lifestyle.

Perfectly adjusted water stream: The PERLATOR® HONEYCOMB® SSR aerator allows the direction of the water stream to be adjusted to suit the washbasin.

KWC AVA E

Pure elegance for the bathroom

Elemental joy for architectural devotees: the refined round and square designs ensure that the award-winning faucets integrate seamlessly into their surroundings, the purist design language is complemented by the stainless steel components. This creates a harmonious counterpoint between the sleek silhouette and its practical nature, its matte finish gently reflecting the tones of its surroundings.

KWC AVA E not only makes the bathroom more beautiful, but heightens the pleasure of being in it: using the lever becomes a daily source of luxury and tactile joy. The stainless-steel finish is easy to clean, durable, scratch- and abrasion-resistant, and hygienic.

KWC BEVO

A minimalist classic

How can tangible values such as longevity, precision, and functionality be combined with classic elegance? KWC BEVO provides the answer: it takes a lot of attention to detail. This is evident at first sight – thanks to its slender silhouette, classically shaped spout, and unmistakable lever design. And it is perceptible in everyday use, too – thanks to top class materials and high-tech workmanship.

The basalt grey cap cleverly accentuates the weightlessness of the fitting, giving the lever a floating appearance.

KWC DOMO | 6.0

Switzerland's most popular faucet quality redefined

Few design objects have managed to remain modern for almost 40 years, but the KWC DOMO, probably Switzerland's best-selling faucet, has done just that. And that is not where its story ends. This millionfold proven faucet has undergone careful design developments and been combined with cutting-edge technology to create the latest generation with an even wider range of products: KWC DOMO | 6.0.

Modern look, flawless feel, ergonomic design: the lever and cap form a single unit, eliminating the need for a slit on the top and ensuring the faucet is even more hygienic.

KWC ELLA

Go with the flow

Understated yet bold, refined yet daring – what may seem like a contradiction is actually the key to creating classic design. And KWC ELLA is just that: with its subtle curves, smooth angles, and clear contours, the line of faucets will be as modern tomorrow as it is today.

Restrained confidence: with its subtle, self-assured style, this faucet lends a special touch to every bathroom.

KWC FIT

Beauty without frills

You reach perfection when there is nothing else to leave out. KWC FIT – a faucet pared down to the essentials. Ingenious functionality, top-quality workmanship, refined details, a pleasant feel and an attractive price – not to mention the aesthetics that visually emphasize the art of simplicity.

Without any superfluous details, the essentials really come into their own – in terms of both appearance and experience. Take the gentle lever movement, which makes this faucet remarkably smooth to use.

KWC MANA

A stylish, confident presence

The developers had in mind for the KWC MANA a design which would capture attention at first glance, or sometimes the second, around the bathroom. This is why they designed the spout to be horizontal and slightly conical and added a fine pin lever. The shape transitions are clear and precise; the body lacks escutcheons. This all means that the KWC MANA can be cleaned in no time at all and, above all, makes it into an elegant diva that is extremely friendly and down-to-earth.

The technology behind KWC MANA guarantees savings from using fewer resources. KWC MANA is therefore, highly efficient in using water. And it does this exceptionally quietly.

KWC ONO E

Pure stainless steel aesthetics

Clear lines, high quality materials, refined down to the last detail and a pleasure for all the senses: the quality of the design matches the quality of the construction. The KWC ONO E is made of pure stainless steel with a brushed or chrome-plated surface, which together ensure complete hygiene. The sleek design is complemented by the durable construction – a tap that adds a brilliant touch to any premium bathroom.

The KWC ONO E in stainless steel is already a design classic, and with a diameter of 35 mm, slimmer and more elegant than ever before. Whether with a chrome-plated or brushed finish, this is a stylish premium product from the KWC brand.

The cascade spout acts like a small waterfall in the bath. It is easy to clean. The design and mounting help to prevent unintentional impact with your body.

The aerator is adjustable and almost invisible. For cleaning, simply unscrew and descale separately. The characteristically tall, arched lever mixer provides great freedom of movement in the basin and sets visual highlights in the bathroom.

The KWC ONO E is a complete range with a variety of options for every application in the premium bathroom. Everything is exquisitely finished and seamlessly rounded. Quality and durability are absolutely top class thanks to the high-quality stainless steel.

KWC ORA

Artistic elegance

The striking features of the KWC ORA include the slimline horizontal spout and the cylindrical knob lever. Combined with the softly cubic base, the design of the KWC ORA blends smoothly into the washbasin. The elegant look is backed up with impressive functionality too. The water outlet is wonderfully simple. And the aerator is equally practical. Its angle-adjustable design keeps spraying to a minimum regardless of the size and shape of the washbasin.

KWC VITA 2.0

Exemplary durability

This special tap has been specifically developed for people with motor and sensory limitations. It's perfect wherever user-friendliness, sturdiness and good ergonomics are required. The design of the KWC VITA 2.0 allows for simple cleaning. This guarantees a high level of hygiene and long service life even with intensive use.

The hot and cold water markings are extra large and easy to read. The long lever is particularly straightforward to operate without much force. The curved shape makes cleaning easy. There are no recesses on the lever, no joints and no escutcheon. This helps prevent dirt from accumulating. The Neoperl® Perlator with metal sleeve generates a hygienic laminar stream without drawing in any ambient air. It also minimises water and energy consumption.

KWC VITA PRO 2.0

For special demands

The KWC VITA PRO 2.0 is perfect for exceptionally high day-to-day demands. The stable bar lever on the tap is extraordinarily robust. It's very comfortable in the hand, and can also be used with the elbow or forearm. The bar lever can be shortened as required and fitted at 180 degrees if desired. The KWC VITA PRO 2.0 is easy to clean, and stands out thanks to its hygienic technologies.

Thanks to its non-slip surface, the extra-long, ergonomic lever is easy to operate with little effort, whether by hand, elbow or forearm. The Neoperl® Perlator with metal sleeve generates a hygienic laminar stream without drawing in any ambient air. It also minimises water and energy consumption.

KWC WAMAS 2.0

A sturdy all-rounder

As a new development of a previous model, the KWC WAMAS 2.0 is more streamlined and slightly taller than its predecessor. With the conical body, its design is impressive while remaining simple and functional. The spout and lever are slightly arched in shape. This allows for a smooth water flow, keeps the components clean for a long time and ensures easy cleaning. The material also guarantees the tap's long service life. The KWC WAMAS 2.0 always keeps pace with the times in terms of its look and feel.

The curved shape makes cleaning easy. There are no recesses on the lever, no joints and no escutcheon. This helps prevent dirt from accumulating. The adjustable aerator with metal sleeve keeps water consumption and spray to a minimum.

KWC ZOE

The epitome of elegance

KWC ZOE adds a touch of sophisticated glamour to your bathroom. This elegant innovation is reminiscent of a fountain – not just in terms of its stunning shape, but also thanks to its cutting-edge technology. With its sculptural style, it symbolizes the purity of a natural spring and brings a touch of minimalist splendor into your bathroom. KWC ZOE is equally at home in upmarket private residences as it is in hotels and restaurants.

KWC ZOE truly proves its worth in households where small children are around. Cold water flows when the lever is pointing forward and mixed water runs when it is in the central position, keeping guests of all ages safe from scalding in the bathroom.

KWC Stainless steel basin

Seamless elegance

Whether round or rectangular, the stainless-steel washbasin options from KWC impress with precise radii and edges. The durable material enables effortless, hygienic cleaning and a special coating reduces the appearance of fingerprints perfect – for everyday use. The special brushed finish on the material clearly stands out from conventional surfaces and harmonises perfectly with the stainless-steel lines KWC ONO E and KWC AVA E. Beautifully sophisticated, yet also environmentally sound: at the end of its long life cycle, the washbasin is fully recyclable.

ShowerCulture

Showering is a product of our culture. Harnessing the power of water and using it to increase our well-being is something that makes our everyday lives easier and more pleasant. But there is more to showering than meets the eye. KWC takes things a step further – ShowerCulture makes showering an experience tailored to individual preferences, from invigorating to relaxing. Showering with all the senses is one of life's simplest yet purest pleasures.

Technical information

The bathroom tap applications illustrated in this brochure are examples. Technology and design may change as product development progresses. The suitability of the fittings must be checked individually for each property. Only the specifications and the installation and service instructions of KWC Group AG are authoritative for planning and technical realization. We reserve the right to make changes to the range, model and technical specifications. Dimensions in mm.

Color differences on stainless steel surfaces on different parts of a KWC Group AG faucet made out of stainless steel, cannot totally be excluded. Different factors may lead to a slight color differentiation.

1. Already a slight difference in material composition may cause stainless steel to reflect light differently (more blue or yellow reflections). These differences in steel compositions still fulfill DIN valid material standards. They may occur within one lot of a steel production unit.
2. Different cooling or production treatment parameters may also cause color surface differentiation.
3. Different surface consistency caused by the production process may as well lead to a different light reflection, so that other colors appear.

Our aim is not to have another surface process to guarantee a 100 % stainless steel color consistency. Beside the unique KWC faucet design we would like to keep a puristic surface finish of natural stainless steel in match with our design philosophy.

The ultimate
choice
