**PRECISE &
ELEGANT**

GOOD DESIGN IS WHAT TRANSFORMS EXCELLENCE INTO PERFECTION.

Achieving excellence is part of our everyday life. With sustainability in mind, we aim to set new standards when it comes to design. After all, aesthetic perfection showcases the benefits of a product in the best possible light and creates even more value added – such as that unique sense of delight you get from using the product every day.

The various internationally renowned awards our faucets have received for their design and innovation are testament to our exceptional achievements in creating aesthetic appeal. Below is a selection of some of our most prestigious accolades.

KWC + THE ADDED PLUS OF SWISS QUALITY

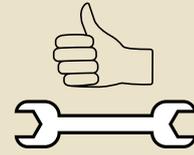

KWC SwissSmartness

Intelligent design culminating in excellent performance: KWC SwissSmartness embodies superior product design that makes perfection and elegance not only visible, but also tangible.

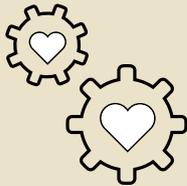

KWC QualityControl

Exceptional quality from A to Z: with KWC QualityControl, we guarantee the utmost product reliability. KWC performs and continuously monitors all stages of the process: development, production, installation, and even the manufacture of the required tools.

KWC ServiceControl

A commitment to quality that extends long after delivery: KWC ServiceControl is backed by a well-trained team of tried-and-true KWC experts in Switzerland. In the event of a claim, they are on site in no time at all – equipped with the right tools and the necessary expertise.

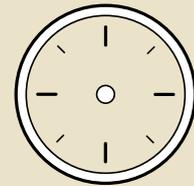

KWC DetailPassion

Crafted with love, down to the last detail: KWC DetailPassion describes our legendary eye for subtle nuances and that special something. This valuable skill has made us a leading international supplier of superior quality faucets that continue to raise the industry standard.

KWC CertificationGuarantee

Trust is good, certifications are better: our KWC CertificationGuarantee ensures that we have all of our products professionally inspected and certified across all markets.

KWC TimelessDesign

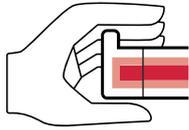

Designed for longevity: KWC TimelessDesign represents exacting aesthetic standards of elegance and perfection that are at once modern and timeless.

KWC InnovationDrive

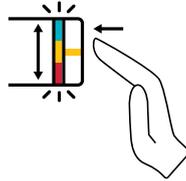

A tradition of innovation: Our innate passion for challenging the status quo, optimizing products and processes, and setting trends – that is KWC InnovationDrive. A unique spirit that has defined us since 1874.

KWC + INNOVATION

TouchProtect

Safe to use: An insulated hot water guidance system with a "double skin" principle means the body of the faucet or the pull-out spray can become warm but never hot. In this way, TouchProtect intelligently prevents scalding.

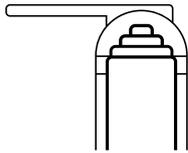

IntelligentControl

Intuitive control meets modern convenience: IntelligentControl reacts to a tap of your finger, can be programmed based on your personal habits and requirements, and has a light ring that indicates the current water temperature.

SkinProtect

Effective protection against scalding: With SkinProtect, your faucet will only supply you with water hotter than 38 °C when you press the safety button on the temperature controller. If the cold water is shut off, the faucet automatically shuts off the hot water immediately.

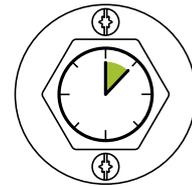

ShieldProtect

Extended service life and secure protection: ShieldProtect uses a special membrane to seal the faucet, protecting it against cleaning products and dirt.

SwivelStop

Stop the faucet from moving too far and prevent water damage: SwivelStop allows the swivel range to be adjusted from 360° to 120° or 150° in just a few steps, ensuring that the water only flows into the sink.

QuickInstallation

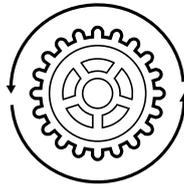

Hassle-free positioning and fastening of the threaded connection for quick and easy installation: the locking nut is screwed into place by hand to hold the faucet in position using QuickInstallation, before it is fixed in place via the two locking screws.

KWC + QUALITY

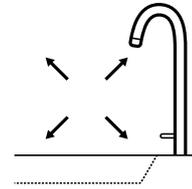

GlacierFinish

Robust surfaces and high-quality craftsmanship: GlacierFinish is equipped with durable surfaces that are exceptionally robust and feature an attractive polished shine that you can enjoy for years to come.

PrecisionMove

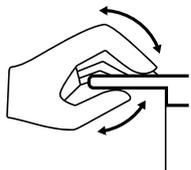

Exceptional elegance and precision: PrecisionMove allows for seamless movements and exceptional convenience thanks to our consistent use of top-quality materials and superior craftsmanship.

OptimalSpace

Practical yet elegant ergonomic design: OptimalSpace features long, tall spouts that provide ample space for washing and or working.

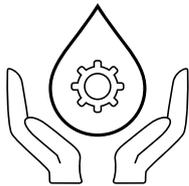

KWC + DESIGN

UniqueLever

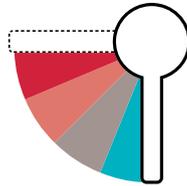

Innovative lever designs that allow for natural and intuitive use: UniqueLever features innovative KWC design – elegance and precision that you can not only see, but also feel every day.

KWC + SUSTAINABILITY

HealthProtect

Better hygiene and unchanged water quality: HealthProtect highlights the strict standards we set ourselves to ensure that our faucets do not affect the taste and smell of your water – that is why we use high-quality materials (metals, plastics) that are ideally suited for contact with water.

CoolFix

Intelligent and efficient resource usage: With CoolFix, when the lever is in the center – the most common position – the water runs cold. Only when the lever is turned to the left, the water runs warm.

EcoProtect

For the highest energy classes and responsible use of resources: EcoProtect represents our commitment to promoting a sustainable lifestyle. For example, the turning handle that limits the water flow level. To switch off the water-saving mode, simply turn the handle back past the soft catch point.

Achieving excellence in anything is a journey, a constant pursuit of perfection. For KWC and the great craftsmen we employ, this journey has led to our company being recognized as one of the finest makers of faucets anywhere in the world.

**KWC: THE
PURSUIT OF
PERFECTION**

IT IS A RECOGNITION THAT WE NEVER TAKE LIGHTLY.

Because we see our life's work for what it truly is: the opportunity to make a perfect product. One that connects all who use it, with the one true source of life on this planet ... a source we in Switzerland have been blessed with in great abundance. Water.

Through design, through a tremendous sense of aesthetics, through precision and handcrafting, and yes, through a good deal of blood, sweat, and tears, a long time ago, we recognized one undeniable truth:

AT KWC, OUR DESTINY WAS NEVER TO INVENT THE FAUCET, OUR DESTINY WAS TO PERFECT IT.

Fortunately for us, we just happened to be genetically and geographically predisposed to creating perfection, after all, we're Swiss. It's in our DNA. And so it was, back in 1874, when KWC was founded by Adolf Karrer, that this journey of perfection would begin. Not with faucets initially, but with exquisite music boxes.

Even back then, a strong sense of aesthetics had KWC creating works of art, but it was an art form that combined artistry with mechanical mastery. KWC's music boxes became famous, not only for their beauty, but for their precision and for their tremendous attention to detail.

As all journeys can take interesting turns, so too would ours. In the late 1800s, the demand for convenient access to water in households was growing – so much so, that soon KWC would test the waters, so to speak, and begin the production of faucets. It didn't take long before KWC's unique ability to combine artistry with mechanical mastery would set us apart.

By 1906, some of the great brands of the era were knocking on our door and asking us to produce custom-made faucets that would meet, or better still exceed their expectations. These included the Ritz hotel in Paris, the Negresco hotel in Nice, and many more.

WITH THIS KIND OF ATTENTION, WORD SOON SPREAD ABOUT KWC, ABOUT ITS ARTISTRY, ABOUT ITS CRAFTSMANSHIP, ABOUT ITS ATTENTION TO DETAIL AND ITS QUALITY.

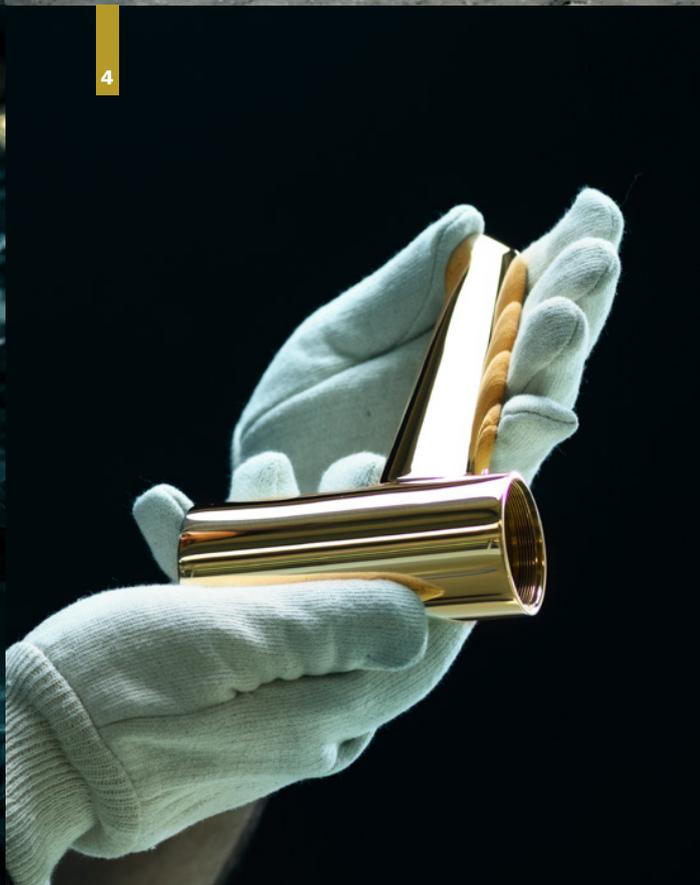

The world had discovered the Swiss watch of faucets. And it wanted more. KWC perfected the faucet design and created a legacy of industry firsts, like the retractable hand faucet from 1957. And they continued to do it again and again with a spirit of innovation never seen before.

TO THIS DAY, IN EVERY SKETCH OUR DESIGNERS MAKE, EVERY DIE WE CAST, EVERY FAUCET WE POLISH BY HAND, ECHOES OF A GREAT HISTORY ARE ALL AROUND US. SO TOO IS A VISION FOR OUR FUTURE.

It is a vision that recognizes the gift of nature that we Swiss feel down to our core and the need for sustainability rather than disposability.

It is a vision that allows every customer to experience the power, the beauty, and the essence of nature that flows through our products. To have a true Swiss Water Experience. Precise. Elegant. And it is a vision that keeps us on this journey that began over one hundred and forty years ago, in pursuit of perfection and the achievement of excellence in connecting humans with water

That is purpose.
That is Swiss.
That is KWC.

1 — Blanks for fittings. **2** — View of the foundry in Unterkulm in 1880. Our experience and knowledge have both origins and history. **3** — In 1978, KWC developed and began to use the first low-pressure die-casting machines in the world. The company still employs this technique today. **4** — Each individual part is accurately machined in a step-by-step process. In order to meet the high quality standards, the procedure is continually monitored before moving on to postprocessing.

5 — To make the fittings, pure brass, which arrives in the form of ingots, is used. **6** — The basic shape of the fitting in brass. **7** — With low-pressure die casting, the brass is first melted and then poured into sand molds, creating the basic shape of the fitting in brass.

BEAUTY WITHOUT FRILLS

You reach perfection when there's nothing else to leave out. KWC FIT – a faucet pared down to the essentials. Ingenious functionality, top-quality workmanship, refined details, a pleasant feel and an attractive price – not to mention the aesthetics that visually emphasize the art of simplicity.

Without any superfluous details, the essentials really come into their own – in terms of both appearance and experience. Take the gentle lever movement, which makes this faucet remarkably smooth to use.

PURE ELEGANCE FOR THE BATHROOM

Elemental joy for architectural devotees: the refined round and square designs ensure that the award-winning faucets integrate seamlessly into their surroundings, the puristic design vocabulary complemented by the stainless-steel materials. This creates a harmonious counterpoint between the sleek silhouette and its practical nature, its matte finish gently reflecting the tones of its surroundings.

KWC AVA E not only makes the bathroom more beautiful, but heightens the pleasure of being in it: using the lever becomes a daily source of luxury and tactile joy. The stainless-steel finish is easy to clean, durable, scratch- and abrasion-resistant, and hygienic.

THE EPITOME OF SIMPLICITY

Unique flat lever, elegant soft-cube design, ultrasleek silhouette – those with an eye for the essential will recognize the clear statement in the new KWC AVA 2.0. Whoever lives here knows exactly what they want from life – and from their bathroom: stylish confidence, simple elegance, excellent quality, and functionality so perfect that you barely even notice it.

Form Meets Function

The unique flat lever of KWC AVA 2.0 is symbolic of its perfect synthesis of modern architecture and contemporary lifestyle.

Trend-setting Innovation

Perfectly adjusted water stream: the PERLATOR® HONEYCOMB® SSR aerator allows the direction of the water stream to be adjusted to suit the washbasin.

THE EPITOME OF ELEGANCE

KWC ZOE adds a touch of sophisticated glamour to your bathroom. This elegant innovation is reminiscent of a fountain – not just in terms of its stunning shape, but also thanks to its cutting-edge technology. With its sculptural style, it symbolizes the purity of a natural spring and brings a touch of minimalist splendor into your bathroom. KWC ZOE is equally at home in upmarket private residences as it is in hotels and restaurants.

- HealthProtect

- SprayClean
- PowerClean
- EasyLock
- LEDShine
- SwivelStop
- GlacierFinish
- PrecisionMove
- OptimalSpace

KWC ZOE truly proves its worth in households where small children are around. Cold water flows when the lever is pointing forward and mixed water runs when it is in the central position, keeping guests of all ages safe from scalding in the bathroom.

MAXIMUM PRECISION

KWC ONO brings both practicality and elegance to the bathroom. With its streamlined look and cylindrical form, its striking lever and its clever functions, it sends out a clear message: the people who live here have class. This versatile, multiple-award-winning product line offers a uniquely broad range and will appeal to discerning users who appreciate timeless yet intelligent bathroom design.

One of KWC ONO's particularly characteristic features is its distinctive operating lever, which is made of the kind of unbreakable, corrosion-resistant stainless steel you would normally find in medical technology. The lever's graceful form is cleverly designed to prevent annoying deposits of dirt from collecting in joins or on edges.

KWC **ONO touch light PRO**

WATER THAT RESPONDS TO YOUR TOUCH

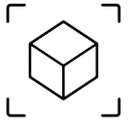

KWC ONO touch light PRO makes every important element seem simple, leaving you to focus on the essential issues in the bathroom. This clever faucet takes the benefits offered by the electronically operated KWC ONO and enhances them with a touch of sophistication and an even greater dose of technological intelligence.

With this faucet, the exception is the rule: you can fine-tune the preset water temperatures and flow rates to your exact preferences. A gentle turn is all that is required to adjust the temperature, or just push and turn to change the flow rate.

A MINIMALIST CLASSIC

How can tangible values such as longevity, precision, and functionality be combined with classic elegance? KWC BEVO provides the answer: it takes a lot of attention to detail. This is evident at first sight – thanks to its slender silhouette, classically shaped spout, and unmistakable lever design. And it is perceptible in everyday use, too – thanks to top-class materials and high-tech workmanship.

The basalt grey cap cleverly accentuates the weightlessness of the fitting, giving the lever a floating appearance.

EXTRAVAGANT RESTRAINT: KWC BEVO MATT BLACK

The design: an award-winning homage to the original shape of the faucet, expertly reduced down to the essentials. The color: a strong statement that perfectly complements the simplicity of the faucet.

The KWC BEVO matt black: a faucet that fits in with its surroundings with such confidence that it stands out despite its restrained design.

FUTURISTIC LIGHTNESS: KWC BEVO BRUSHED STEEL

How can you highlight the minimalistic design and the fine balance between soft contours and straight lines? KWC BEVO brushed steel has the answer: with a finish that adds a touch of weightlessness to the robustness and reliability of the faucet.

GO WITH THE FLOW

Understated yet bold, refined yet daring – what may seem like a contradiction is actually the key to creating classic design. And KWC ELLA is just that: with its subtle curves, smooth angles, and clear contours, the line of faucets will be as modern tomorrow as it is today.

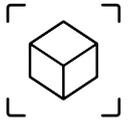

Restrained confidence: with its subtle, self-assured style, this faucet lends a special touch to every bathroom.

SWITZERLAND'S MOST POPULAR FAUCET QUALITY REDEFINED

Few design objects have managed to remain modern for almost 40 years, but the KWC DOMO, probably Switzerland's best-selling faucet, has done just that. And that's not where its story ends. This millionfold proven faucet has undergone careful design developments and been combined with cutting-edge technology to create the latest generation with an even wider range of products: KWC DOMO | 6.0.

Modern look, flawless feel, ergonomic design: the lever and cap form a single unit, eliminating the need for a slit on the top and ensuring the faucet is even more hygienic.

KWC **PILLAR TAP**

WHEN LESS IS MORE

In restrooms and public spaces, turning water on and off should be hygienic and practical. The KWC pillar tap works for you with just one easy turn. Not only in its ergonomics and user-friendliness, but also in its use of resources, less is more – five liters per minute, to be precise. The KWC pillar tap is suitable for hot and cold water connections and, due to its sleek design, is an aesthetic fit in any setting.

The KWC pillar tap is also the ideal solution for the home. It works well as a space-saving and resource-saving washbasin faucet or as a dispenser for drinking water.

Showering is a product of our culture. Harnessing the power of water and using it to increase our well-being is something that makes our everyday lives easier and more pleasant. But there is more to showering than meets the eye. KWC takes things a step further – ShowerCulture makes showering an experience tailored to individual preferences, from invigorating to relaxing. Showering with all the senses is one of life's simplest yet purest pleasures.

**SHOWER
CULTURE**

PURE UNADULTERATED PLEASURE

Are you renovating an old building and looking for a state-of-the-art, space-saving shower solution? Or do you want to create a complete extra bathroom in a new building with limited space? Our shower systems are designed for just these kinds of scenarios. Not only will they appeal to your flair for the aesthetic, but they are also ideal for installing with existing faucets.

Make the most of your existing bathroom fittings with our replacement solutions. We can replace sliding wall bars with water-bearing versions, or enhance your existing bathtub or shower mixer with a showerhead and hand shower of your choice and a KWC thermostat. You can also incorporate our replacement solutions into older bathrooms as surface-mounted installations, using the same connections and drill holes.

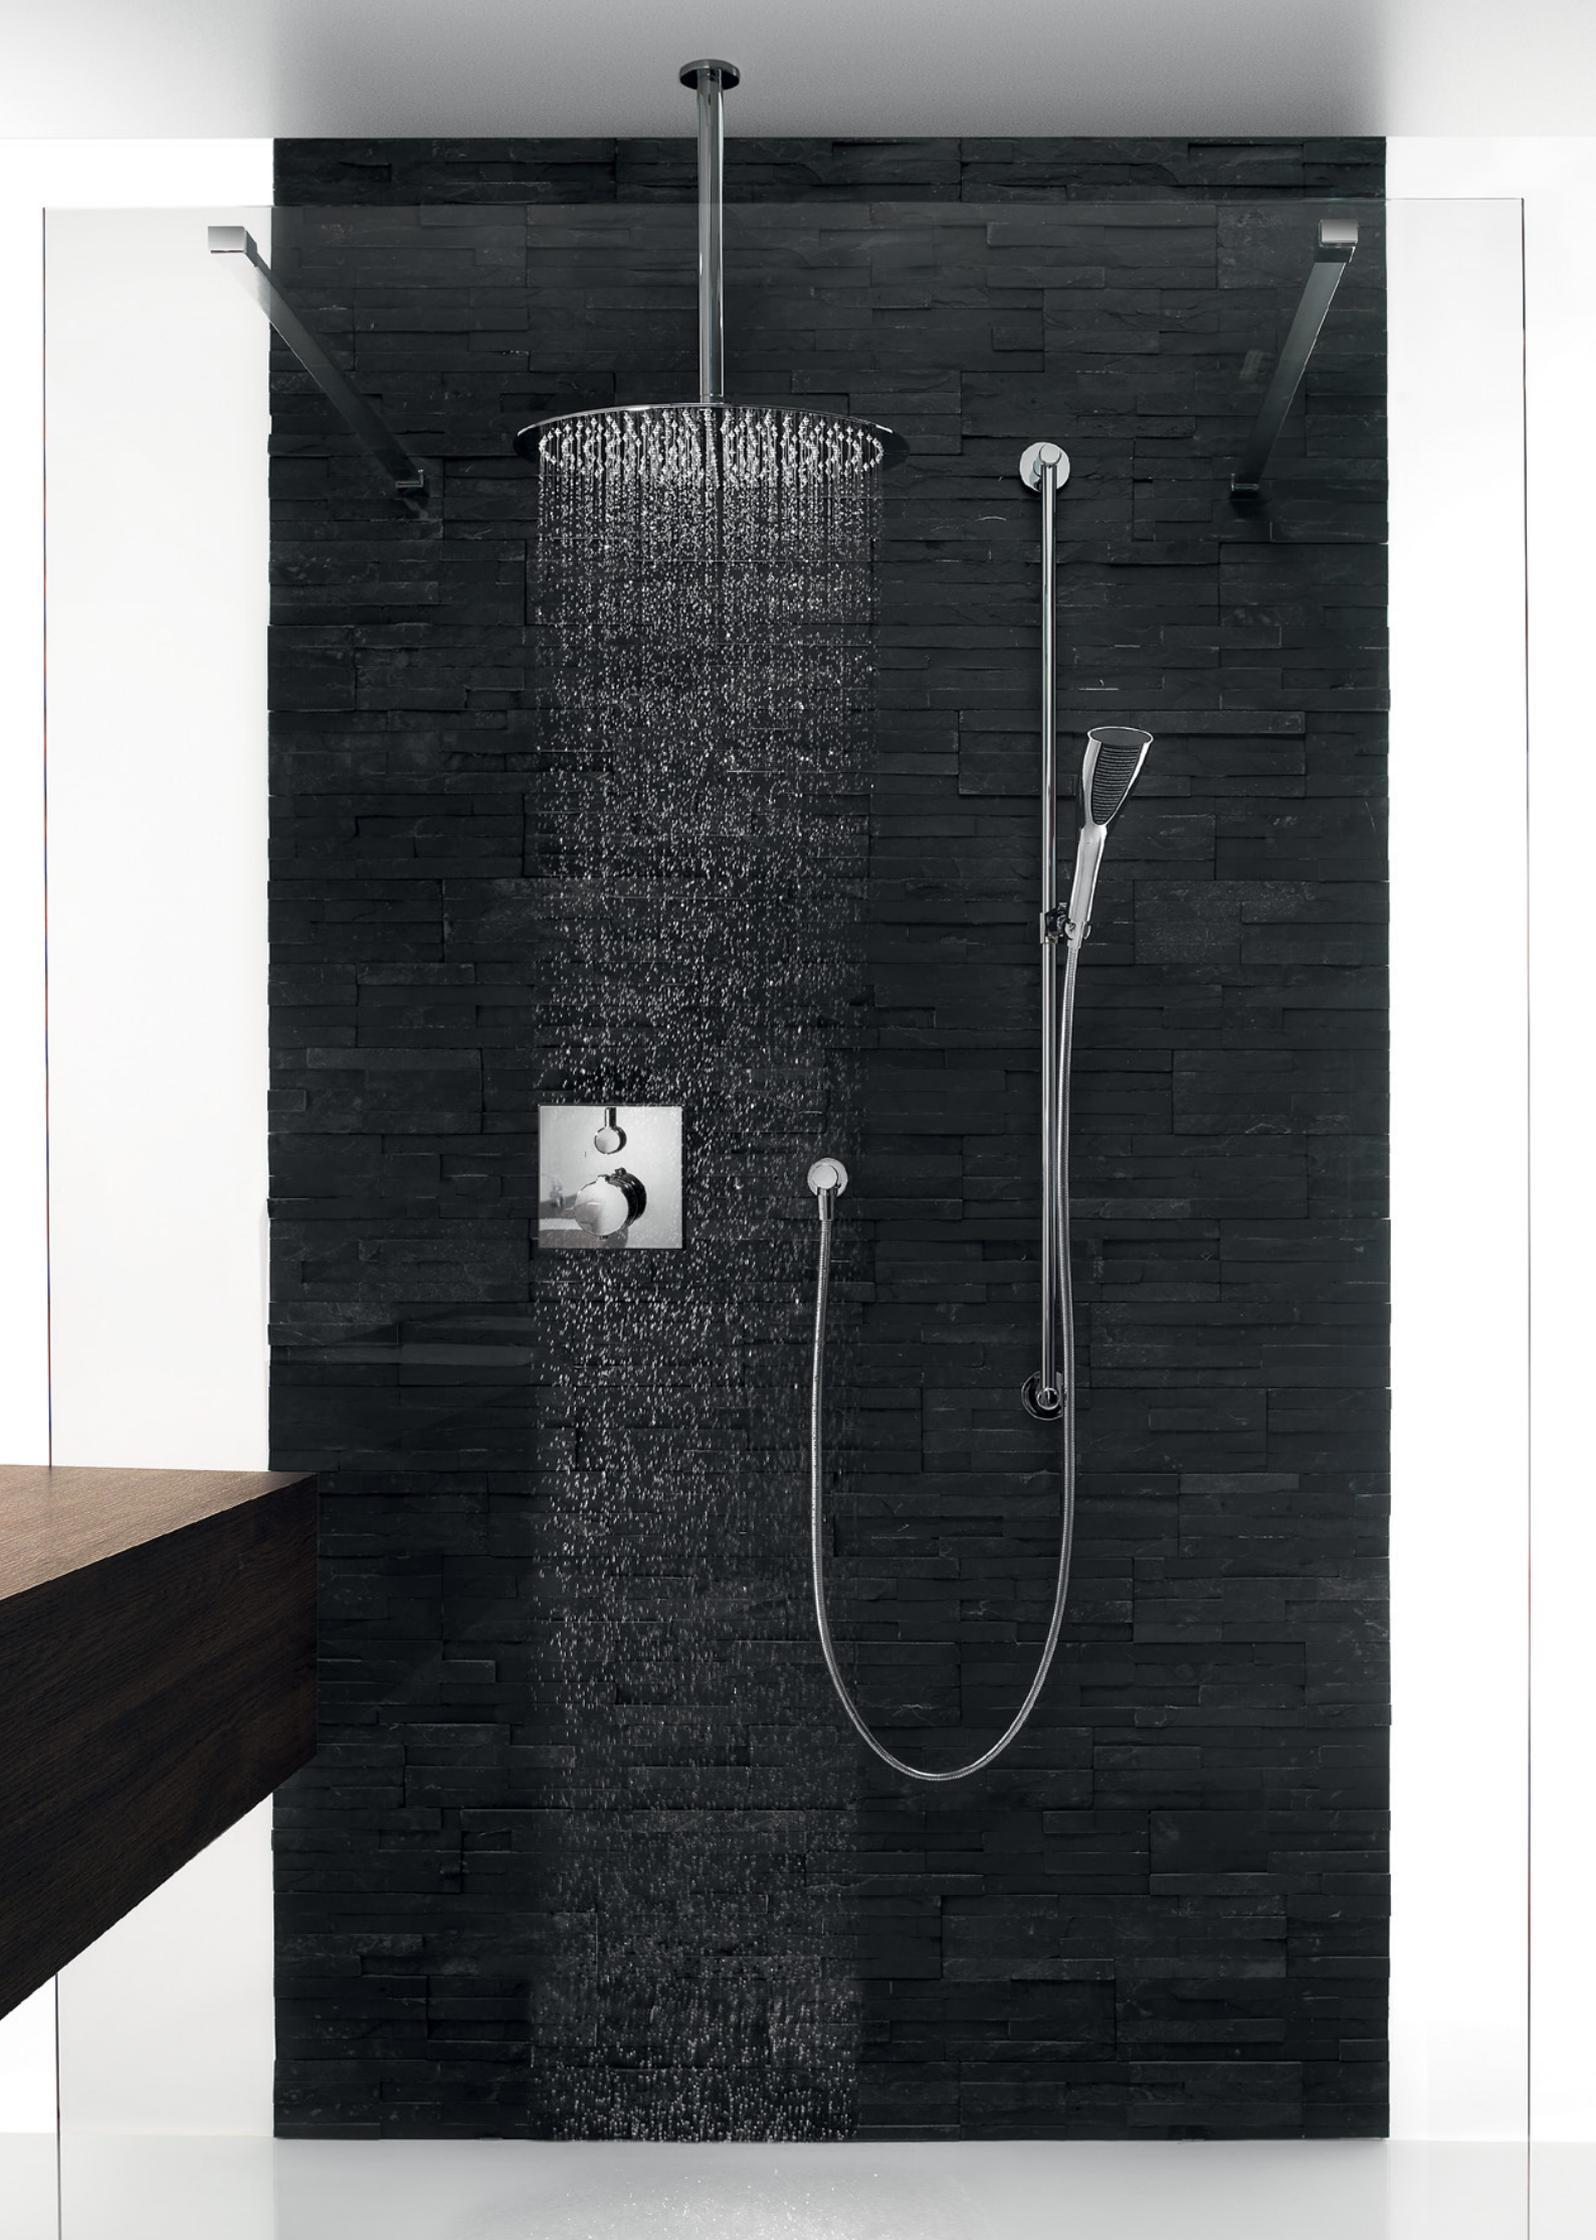

KWC's surface-mounted solutions create plenty of scope for your ideas with very little effort. They offer you a cost-effective alternative for new buildings. Or, if you are renovating an old building, you can use the existing connections and upgrade your previous installations into a smart shower system by replacing just a few elements. Our preconfigured surface-mounted solutions are available for various KWC product lines.

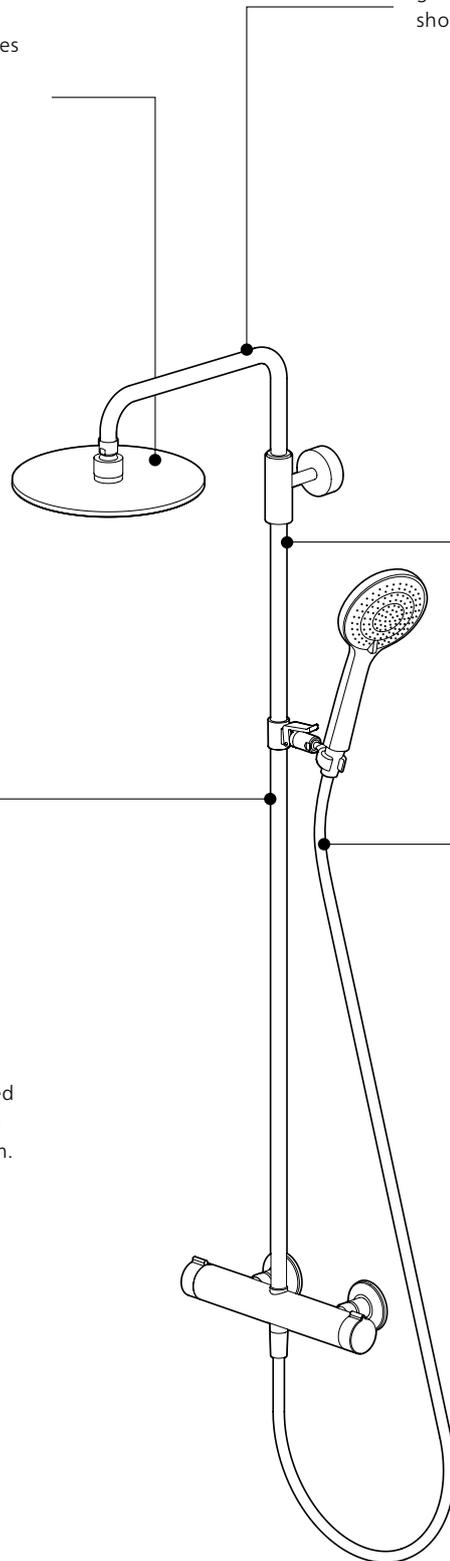

With these shower systems, you can make your personal design dreams come true to exceptionally elegant effect, be it in a new building or in a complete refurbishment. To do this, you can choose your preferred model from our wide range of showerheads, hand showers, mixers, and thermostats. We offer you virtually unlimited scope for combining different elements.

The KWC PIATTO-X R showerhead features a practical ball joint. To avoid limescale buildup and dirt deposits, simply tilt the showerhead. This allows any residual water to drain off and prevents dripping.

The swiveling shower arm can easily be swiveled to the left or to the right, giving you all-round flexibility in the shower, even in tight spaces.

The water-bearing sliding wall bar can be shortened as required. The pipe-in-pipe system ensures that it never gets too hot, which prevents scalding.

The hand shower can be positioned at whatever angle you like and is guaranteed to stay firmly in place, not least thanks to the lockable elevation adjustment system.

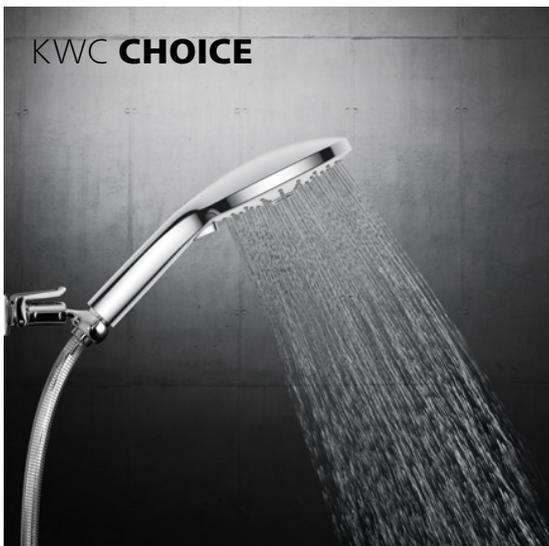

KWC shower hoses come with a rotatable cone as standard. This prevents the hose from becoming twisted, even if it is moved around a lot.

A DAILY BURST OF REVITALISATION

With our hand showers, your shower experience is quite literally in your hands. We can offer anything from classic designs to novel innovations, so you can feel a sense of relaxation washing over your body and soul.

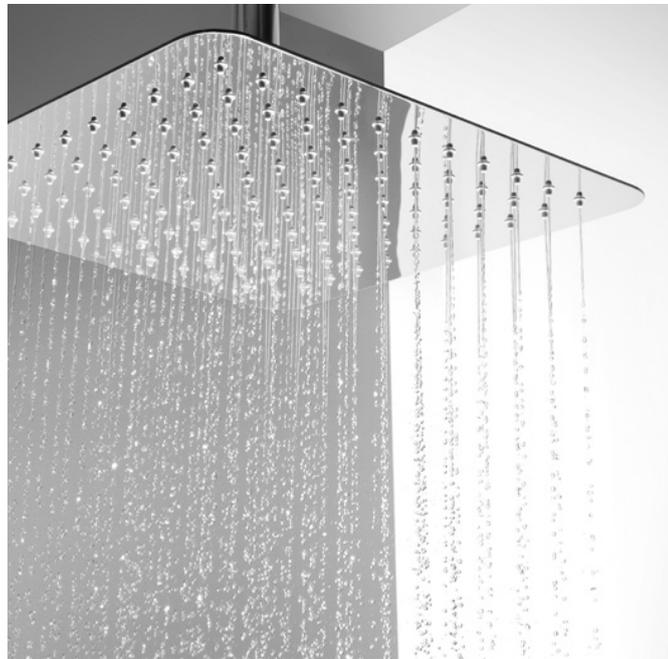

SHEER SIMPLICITY

Get ready for a thoroughly relaxing experience with showerheads from KWC, and add a touch of sophisticated style to your bathroom. The KWC PIATTO-X showerheads bring a sense of creative freedom to your shower, allowing you to express a cubic, architectural design style or a more rounded, harmonious one.

A swiveling ball joint enables you to set your KWC PIATTO-X showerhead to whatever angle you prefer. After your shower, simply tilt the showerhead to allow any residual water to flow out and prevent limescale buildup.

Measuring just 5 mm in width, KWC PIATTO-X presents an attractively slim profile, no matter whether you opt for a round version (R250, R300, R400) or a square one (Q250, Q300, Q400).

KWC SLIDING WALL BAR KWC FIT

THE ORIGINAL: OUR INVENTION FOR SWISS BATHROOMS

Almost exactly 40 years ago, KWC developed and patented the shower sliding wall bar. Since then, it has proven itself a million times over, and has become a permanent fixture in showers for all types of buildings and price segments. And that alone makes it worth more than any other variant that has come along since, because it is the best proof and finest illustration of KWC's legendary quality and total safety. We're proud of this. The original is and remains KWC. With KWC you know what you are getting: Swiss expertise and quality.

Technical Information

The bath faucet applications shown in this brochure are examples only. The technology and design may be subject to change during further product development. The suitability of the faucets for the property concerned must be checked on a case-by-case basis. Planning and technical implementation is subject exclusively to the specifications and assembly and service instructions provided by Franke Water Systems AG, KWC. Relevant information can be ordered from KWC or found at www.kwc.com.
