Press release

KWC ONO E – Pure stainless steel aesthetics

The new KWC ONO E is a stainless steel tap in filigree perfection for the premium bathroom.

Slimmer than any other KWC bathroom fitting. Clear lines, high-quality materials, refined down to the last detail and a pleasure for all the senses: the quality of the design matches the quality of the construction. The KWC ONO E is made of pure stainless steel with a brushed or chrome-plated surface, which together ensure complete hygiene. The sleek design is complemented by the durable construction – a tap that adds a brilliant touch to any premium bathroom.

Beautiful in detail

The radial brushing emphasises the curved character of the tap. The fine workmanship and minimal gap widths are also testament to the attention to detail. This makes even the largest version appear light and elegant. A timeless design.

Effortlessly sleek

The KWC ONO E in stainless steel is already a design classic, and with a diameter of 35 mm, slimmer and more elegant than ever before. Whether with a chrome-plated or brushed finish, this is a stylish premium product from the KWC brand.

Delicate throughout

The operating lever does not require a recess. Slightly bevelled surfaces on the lever and spout emphasise the airiness of the design.

Versatile and durable

The KWC ONO E is a complete range with a variety of options for every application in the premium bathroom. Everything is exquisitely finished and seamlessly rounded. Quality and durability are absolutely top class thanks to the high-quality stainless steel.

More hygiene

An aerator for greater hygiene. The aerator can be adjusted by 7° in all directions. Less splashing water means easier cleaning and better hygiene.

More space

The operating lever hovers directly above the washbasin. This helps to avoid water and limescale residues outside the washbasin. The result is cleanliness and plenty of space for your hands.

More movement

Plenty of hand clearance with low overall height. The special design enables convenient operation and adapts to requirements. The swivel spout has a radius of 120° and can alternatively also be fixed.

Additional information

KWC Group Ltd.

As an international premium manufacturer of faucets and fittings, we are the epitome of Swiss quality, iconic design, and sophisticated functionality for product solutions in bathrooms, kitchens, and catering environments. Whether in the private or (semi-)public sphere – every single one of our products reflects almost 150 years of experience, expertise, and outstanding craftsmanship.

From the heart of Switzerland, we strive to sustainably enrich people's quality of life.
